

ENVIRONMENTAL POLICY

Management of Linecross is aware that all of its activities associated with the development, manufacture, distribution and use of its products can have a direct or indirect influence on the environment. Environmental protection is a serious obligation within the company. Management has therefore defined the following principles for our environmental policy.

The Role of Environmental Protection

Linecross undertakes to achieve its other business objectives with due regard for the need to protect the environment. The methodology we use to achieve this undertaking is the operation of an environmental management system compliant with ISO 14001.

Our Employees

Environmental protection is a matter for each and every employee. By informing our employees of this policy, we encourage our environmental awareness. Training and motivation are directed towards securing an environmentally sustainable future for all.

Avoiding Strains on the Environment

We undertake to treat natural resources carefully and conscientiously, particularly in regard to the use of energy and raw materials. We are committed to avoiding pollution and we aim to reduce the generation of wastes with the aid of appropriate technology and processes. We ensure that wastes which cannot be avoided or recycled are disposed of in an environmentally acceptable manner.

Continual Improvement

To achieve our environmental goals, we set regular targets and objectives, which aim to ensure continual improvement of our environmental performance. We operate environmental programmes to achieve the set targets and objectives.

Involvement of Suppliers and Customers

We expect our suppliers to honour their obligation to operate in an environmentally-friendly manner while improving their environmental performance. We are aware of the potential negative impact of the ultimate disposal of our products on the environment, so we will co-operate with our customers' initiatives to reduce this.

Legislation and Regulation

We undertake to comply conscientiously with all applicable legislation and regulations in the field of environmental protection.

Communication

We aim to communicate openly with the regulatory authorities, our customers, our employees and other stakeholders in all matters relating to environmental protection. This includes making this policy publicly available.
